DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 38-58, is drawn to a method of synthesis using a porous device.

Group II, claim(s) 59-61, is drawn to a method of synthesizing a plurality of different compounds.

Group III, claim(s) 62, is drawn to a method of effecting an interaction between an active material and another material.

Group IV, claim(s) 63-65, is drawn to a porous device.

Group V, claim(s) 66-68, is drawn to a collocation or an assembly.

Group VI, claim(s) 69, is drawn to a method of synthesizing a library of compounds.

Group VII, claim(s) 70-72, is drawn to a method of manufacturing a porous device.

Group VIII, claim(s) 73-74, is drawn to a substrate.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking groups I-VIII appears to be that they all relate to a porous device comprising a body having an internal region, which is porous wherein an active material is entrapped within the internal region. This special technical feature is well known in the art.

However, Rohrbach et al. (1980) disclose a support matrix for immobilizing enzymes (Abstract; col. 6, lines 25-35). The support matrix comprising a combined organic-inorganic material. The inorganic material consists of a porous support material that contains an organic

material, which is entrapped in the pores of the support. The organic material contains functionalized groups to which an enzyme may be coupled.

Therefore, the technical feature linking groups I-VIII does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
